

**ADVANCED  
DETECTION  
SYSTEMS**

# **COMPACT FLAT SCAN 7000 METAL DETECTORS:**

Ideal for plastics regrind applications. Compact coil design allows our Model 7000 to be mounted inside the conveyor frame, close to the belt.

Automatic coil balancing for maximum sensitivity

Simple, easy to use operator controls

External reset button, detect light and detect counter

Detects all types of metal - ferrous, stainless steel, copper, lead, aluminum, bronze, etc.

All US made components for quick replacement if necessary

Belt widths from 12" to 36"

NEMA 4 enclosure

All engineering and technical service located in US

Custom design and application assistance available

*Note: The Flat Scan single coil design metal detector is intended for use with burden depths up to 3"*
