## ProScan Max III Pipeline Metal Detection Systems

The ProScan Max III pipeline metal detection system is ideal for ice cream and soft cheese applications. Advanced Detection Systems' focus on today's stringent food safety regulations is reflected in several standard features including; administrator assigned user names and log-in levels allowing Max III users to abide by user identity requirements, data logger access through a downloadable thumb drive, running list of recent detection history visible from the menu and flexible automatic reject timing to insure a reliable detect and reject process.

Advanced Detection Systems encourages food processors to use our free product testing service. All product testing results are accompanied by Advanced Detection Systems' Sensitivity Guarantee.
