Ultra’s detection level is 2x better than the standard Protector HD

DESIGNED TO PROVIDE ENHANCED METAL DETECTION LEVELS

The Protector HD Ultra, a heavy-duty industrial grade metal detector is used when an extra level of metal detection performance is required to defend processing equipment, detect fire hazards (such as lithium batteries) and ensure product purity. Each Protector HD Ultra is built to your application specifications and sized to meet your specific needs. Advanced Detection Systems’ proprietary AccuLearn software, built into every unit, can automatically adjust the detector’s sensitivity based on your product’s characteristics and detection level requirement.

THE ADVANCED DETECTION SYSTEMS DIFFERENCE

For the past 30 years, Advanced Detection Systems has been developing SurroundScan technology so each system performs reliably in the presence of power fluctuations, radiated noise and system vibration. In addition, Advanced Detection Systems developed patented state-of-the-art electronics that provide easy setup in the most demanding locations; meeting your processing needs and reliably detecting metal contaminants.

HOW WE HANDLE AFTERMARKET CARE

Advanced Detection Systems focuses on providing excellent aftermarket services. We offer prompt field service, troubleshooting, metal detector startup, product testing, and training.

**PROTECTOR HD ULTRA METAL DETECTOR**

*Detects Lithium Batteries, Ferrous, Non-ferrous, and Stainless Steel Metals*

Ensures Product Purity and Detects Safety Hazards

- **AccuLearn Technology**
  - Quickly learns product characteristics and establishes the ideal detector sensitivity

- **Patented Auto-Balance**
  - Keeps the Protector’s coils balanced indefinitely for consistent detection levels

- **Product Monitor**
  - Provides real-time signal values for your product and the metal contaminants that must be detected

- **Custom Sizing**
  - Get a Protector HD Ultra built to fit your existing processing line

- **Engineered & Manufactured In-House**
  - Prompt response to customer needs by designing and building a quality system delivered when promised

- **Nationwide Service**
  - Local technicians to assist with start-up, training, emergency service calls and other aftermarket services

**ENHANCED DETECTION LEVELS**

Protector HD Ultra is designed to detect lithium batteries before they become a fire hazard. Contact an Advanced Detection Systems metal detection expert to arrange free product testing for your specific application.

**SURROUNDSCAN TECHNOLOGY**

- **AccuLearn Technology:**
  - Allows automatic adjustment of detector sensitivity settings without operator input

- **Product Monitor:**
  - Easily programmed to detect specific sized contaminants

- **Adjustable RF Protection:**
  - Ensures reliable performance in the presence of radiated noise and electrical power fluctuations

**STANDARD SPECIFICATIONS**

- Power Supply: 110VAC 30VA max, single phase, NEMA 4 enclosure
- PLC Outputs: Voltage-free relay contacts rating 240V, 3A
- Operating Temps: -28°C to 49°C and -20°F to 120°F
- Reject Timer Options: Reject functions are carried out under microprocessor control and are all set from the touchscreen display

**OPTIONAL ACCESSORIES**

- Control cabinet heater: for 40°F/4°C and below
- Remote control enclosure

**ENHANCED DETECTION LEVELS**

"Detected"

Ultra’s detection level is 2x better than the standard Protector HD
